

high ceilinged, with plenty of large windows & doors. There's a porch running around the outside which prevents the sun from shining directly in on us. There are two rows of big 4 foot electric fans running down the length of the building which keeps the air in motion so we never feel the heat. ~~anyway~~. There are wash rooms at the end of the building with showers. - a really ideal place.

When the rainy season starts in June everything will change. Then practically everything will rot, ~~a~~ mold, or rust. It will rain every day, almost all day - in the beginning at least. Right now is the best time of the year, as far as weather is concerned.

The town we are near continues to be a fascinating place to visit. We may rent <sup>bicycles</sup> ~~spas~~ for 4 cents an hour and go into town that way or take a two-wheeled buggy in. This afternoon I'm going to a concert of recorded music, followed by dinner in town.

I note what you say about seeing a picture of an A.F.S. ambulance in a copy "Life". <sup>We have</sup> ~~don't have~~ some copies out here in our library but they are all old ones. As each unit comes out it brings the latest magazines, so I'm hoping to catch up on "Life" sometime. Thanks for having my name put on the list of voters in Tupper box.

I'm in perfect health - never felt better.  
With lots of love,  
Betty
